

HARLEY ALBERT BUENDIA

Bachelor of Science in Computer Science Student

buendiaharley@gmail.com | 0969 288 3215 | 12D Tocs Ave, Antipolo

PROFESSIONAL SUMMARY

Bachelor of Science in Computer Science student with experience in software development, artificial intelligence, machine learning, computer vision, database systems, and full-stack web development. Proven ability to design and develop real-world software solutions through academic projects and national hackathons. Strong foundation in problem-solving, collaborative development, and modern software engineering practices.

PROJECTS

Sulat Baybayin (AI-Powered Baybayin OCR and Character Recognition System)

- Engineered a computer vision pipeline for Baybayin script detection and classification, enabling automated optical character recognition and sentence assembly from image inputs.
- Created tools for synthetic data generation, dataset preparation, model training, and inference, supporting scalable development of Baybayin OCR and recognition models.

AyudaPay Stellar (Blockchain-Based Aid Distribution Platform | Hack-it-UP 2026 Champion Project)

- Designed and developed a blockchain-enabled aid distribution system that reduces fraud, improves transparency, and enables instant disbursement of financial assistance to beneficiaries.
- Implemented smart contract integration, AI-powered document verification, administrative dashboards, and beneficiary management using Next.js, Supabase, Azure OpenAI, and the Stellar ecosystem.

ACHIEVEMENTS

Champion — CodeKada 2025

November 8, 2025

DevKada Community – School Representative Team (Sci-Coders)

- Developed Rekado Lens, an AI-powered smart scanner for food, beverages, and beauty products.
- The solution analyzes ingredients, allergens, additives, and potentially harmful chemicals while providing personalized health insights.

Champion — Hack-it-UP 2026

May 16, 2026

UP Society of Computer Scientists (UP SoComSci)

- Won Hack-it-UP 2026, a national FinTech-focused hackathon organized by UP SoComSci.
- Collaborated with a multidisciplinary team to design and develop an innovative technology solution addressing real-world financial challenges.

EDUCATION

Senior High School – STEM Strand

APEC Schools C. Raymundo

Junior High School

APEC Schools C. Raymundo

Bachelor of Science in Computer Science

Technological Institute of the
Philippines Quezon City

Expected Graduation: June 2027

SKILLS

- Software Development
 - Object-Oriented Programming (OOP)
 - Data Structures & Algorithms
- Artificial Intelligence & Machine Learning
 - Database Management (SQL/PostgreSQL)
 - Web Application Development
